**Leader in refrigeration and laundry,
catering equipment supply and
maintenance**

COMPANY PROFILE

2019

Introduction

Jimtec Services deals with importation and exportation of laundry and catering equipment, installation, repairing and servicing. We also service refrigeration and cold rooms and stock the spare parts of this equipment.

Our specialty in equipment supply includes:

- * Washing Machines
- * Dryers
- * Presses
- * Flatwork ironers, folders and spreader feeders
- * Dry-cleaning machines
- * Kitchen equipment, among others

With twenty five years of history and experience all the personnel of **JIMTEC SERVICES LIMITED**, from the workers on the factory floor to our sophisticated engineering department and from administrators to sales representatives maintain a spirit of enthusiasm, drive and innovation, a spirit which has served us so well since the early pioneering days.

Our AIM: Total satisfaction of our clients

We are now leader in the global supply of professional laundry equipment to:

- On premises laundries, (hotels and health care organizations)
- Coin-operated laundries
- Clean-rooms (pharmaceutical, medical, micro-electronic, cosmetic, nuclear and food industries)

OUR CLIENTS:

Our customer base has been growing over the years as has our reliability.

Our quality of services has improved and our stringent inspection measures ensure that we offer professional and efficient services. Some of our clients include:-

- TPS - Serena
- TPS – Tanzania
- TPS – Rwanda
- Fairmont Hotels – Kenya
- Laico Hotels – Rwanda
- Kenchic Ltd – Nairobi
- Tribe Village Hotel
- Baobab Beach Hote
- Jacaranda Hotel Ltd
- Kenya Utalii College
- The African Tulip hotel (Tanzania)
- Kimbo Palace Hotel (Tanzania)
- Sopa Lodges Management Ltd (Tanzania)
- Kenya Institute Of Curriculum Development (K.I.C.D.)
- Multi Media University
- Muthaiga Country Club
- Karen Country Club
- K.C.B. Leadership Centre
- Laico ledger Plaza,central Africa republic
- James finlays-Chris Birgen
- Finlay's Horticulture
- M.P Shah Hospital – Nairobi
- Getrude children's Hospital – Nairobi
- Nyeri Provincial Hospital
- Kiambu District Hospital
- Thika District Hospital
- Villa Rossa Kempinski

PRODUCTS AND SERVICES:

Jimtec services limited offers a [comprehensive line of](#) laundry and catering equipment, freezers and coolers [equipment, services, and support](#) making it the leading resource for open source solutions in the region.

Our most important goal as laundry and catering equipment experts and sales organization is to create a professional relationship you can depend on. Maintaining standards of excellence ensure that your equipment acquisitions with **Jimtec services limited** be a pleasurable experience. From the beginning to receiving and using your new equipment, **Jimtec services limited** is always available. This is one of the primary reasons which have helped make us the most trusted name in supply laundry and catering equipment supply.

Jimtec services limited specialize in more than Seventy (70) categories of laundry and catering equipment.

Countrywide; institutions, major hospitals, thousands of physicians, church supported facilities, government facilities, purchasing agents, and prefer purchasing from JIMTEC. The reason is clear, equipment we sell is absolutely certified to proper operating specifications, looks great, is warranted, and is sold at economical prices.

FEEL FREE TO MAKE AN APPOINTMENT TO VISIT OUR SHOWROOM.

Estimates / quotes for all shipping can be ascertained prior to purchases. We shall offer the lowest commercial price available among commonly used shipping companies for your equipment purchase(s) Nationally & Internationally.

Our Vision

To be the preferred distributor and Service organization in the East African Region, distinctive and successful in everything that we do. Being a system supplier, we strive to add value to our customer's value chain by providing them with advanced technology, highest quality equipment, accessories and personalized services.

Our policy is to satisfy customer needs in the best way possible

Our success hinges on performing consistently without compromising on quality

Our ability is to identify customer needs and integrate our activities to provide total solutions

Our promise is prompt, efficient and always cost-effective service

For about eighteen years **Jimtec services limited** highly trained and resourceful staff have executed Jobs of exacting specifications as required by some of most demanding customers in the Eastern African Region. Attention to detail, scrupulous selection of suppliers of components and sub- assemblies, rigorous testing and timely completion characterize our work, no matter how small or large the job.

The pursuit of higher quality is vital for all business in the highly competitive international market. **Jimtec services limited** is currently heading towards ISO 9001: 2000 certifications. The result will be consistent, pro-active control of quality of management, quality of production and quality of service

Our Values

1. Our first priority is to satisfy customers.
2. We help our fellow employees improve their skills, encourage them to take risks, treat them fairly, and recognize their accomplishments, stimulating them to approach their jobs

with passion and commitment.

3. We build trust and teamwork with open, candid communication up and down and across our organization. We share technologies and best practices across borders with our suppliers and customers.

4. We focus on speed for competitive advantage. We simplify processes and strive towards efficiency improvements wherever possible.

Commitment to Quality

We appreciate that our customers want to use our products and services to increase their performance and productivity so we at **Jimtec services limited** will

1. Rapidly carry out all necessary developments.
2. Supply cutting-edge, integrated and environmentally-sound solutions designed to provide maximum benefits.
3. Meet all promised deadlines.
4. Provide competent advice and consulting in all situations.
5. Make sure the delivered solutions run reliably at all times.

Our most important task is to continue systematically improving ourselves, our suppliers, our business processes and especially our cooperation at all levels.

JIMTEC'S OTHER SERVICES AND AREAS OF SPECIALIZATION

- ◆ Consultancy services and training on air-conditioning and refrigeration
- ◆ Air conditioners: sizing, installation, service, repair and maintenance and supply of service parts
- ◆ Cold rooms maintenance and servicing.
- ◆ Generator sizing, procurement and supply.
- ◆ Generator installation.
- ◆ Supply of laboratory equipment and servicing.
- ◆ Provide rigging services, i.e. feeder cable installations, microwave transmission equipment installations for micro wave links.

- ◆ Alternating current and direct current power installations inside base stations.
- ◆ Installation and maintenance of aviation warning lights on communication towers to meet aviation safety requirements for low flying air craft.
- ◆ Air conditioning equipment installation and maintenance.
- ◆ Air compressor repairs.
- ◆ Installation and maintenance of elevators.
- ◆ Electrical: supplies and sales, industrial and domestic installations, and upgrading.
- ◆ GSM sites (dc power system i.e. battery and solar maintenance).
- ◆ Installations and maintenance of generators, electrical equipments at base stations.
- ◆ Installations and maintenance of air conditioners.
- ◆ Industrial and domestic electrical maintenance.
- ◆ Fuel pump repairs, calibrations and maintenance.
- ◆ Installation, repair and maintenance of elevators and escalators.
- ◆ Initial machine inspection, assembling and installations.
- ◆ Refrigerators Installations servicing and Maintenance
- ◆ General installations, repairs and maintenance of air conditioner
- ◆ Overhaul and adjustment of all governors, fuel pumps and unit injectors
- ◆ Electrical repairs, with diagnostic test equipment for all electrical equipment including power generation equipment.
- ◆ Aviation lights installations and maintenance.
- ◆ Supply and installation of elevators.

LAUNDRY EQUIPMENT

Laundry Equipment Brands We offer sales, parts and service for the following laundry machine and equipment makes:

Washing Machines

- Girbau
- Speed Queen
- Unimac
- Primus
- Electrolux
- American Laundry Machinery Inc

Dryers

- Ajax
- American Dryer Co
- American Laundry Machinery
- Cissell manufacturing Company

- G.A Braun, Inc
- The Dexter Company
- Edro Corporation / Dyna Wash
- Huebsch
- Ipso
- Maxiwash
- Maytag
- Passat Laundry Systems, Inc
- Pellerin – Milnor Corporation
- Wascomat / Wascator
- Washex
- IMESA Washing Machine
- Tolkar

- Dexter
- Huesbch
- Maxidry
- IMESA Dryer

Flatwork ironers, folder & spreader feeders

- BMM Weston
- G.A Braun, Inc
- Central finishing systems
- Chicago dryer company
- E.M.D' Hooge
- Huebsch
- Jensen / America
- Jensen / Denmark
- Maxifinish
- Passat laundry systems Inc
- Sharper finish, Inc

Presses

- Ajax
- Cissell Manufacturing Company
- Forenta, Inc
- Hoffman/ Newyorker
- Maxi press
- Pantex
- Pony
- Sidi
- Unipress Corporation

Dry-cleaning machines

- AMA Universal
- Boewe perman, Inc
- Donini international
- Flourmatic Midwest, Ltd
- Maxiclean
- Multimatic Corporation
- Spencer
- Union, s.r.l

As you can see, we can provide parts and supplies for a diverse line of manufactures. If you do not see a company you require parts or supplies for, please ask and we will do our best to accommodate you.

Commitment to Quality

Our most important task is to continue systematically improving ourselves, our suppliers, our business processes and especially our cooperation at all levels

With 25 years of history and experience all the personnel of JIMTEC SERVICES LIMITED, from the workers on the factory floor to our sophisticated engineering department and from administrators to sales representatives, we maintain a spirit of enthusiasm, drive and innovation, a spirit which has served us so well since the early pioneering days.

To-day **Jimtec services limited** is a market leader in the heavy-duty laundry industry and is widely recognized as a major supplier of flatwork dryer-ironers, finishers, Hygienic barrier washer-extractors, clean rooms washer-extractors and O P L equipment.

Jimtec services limited achieved considerable success in the hospital and hotel sector around the country and in general on-premises laundry market area. On the other hand, one of the main concerns of **Jimtec services limited** in the recent years has been to improve the safety of health care laundry equipment. It is why since 2005 **Jimtec services limited** pass-thru hygienic barrier washing machine is claimed to reduce the risk of spreading nosocomial infections (hospital-acquired infections) during laundering.

Whenever a contamination free clean room environment is required, **Jimtec services limited** have a solution.

WASHER EXTRACTORS

Designed to reduce water, utilities and detergent consumption

Our large range of washer extractors has been designed to reduce water, utilities and detergent consumption. Most of our machines require 11 liters of water per kilogram washed (mild temperature without pre-wash). Our washers are built to have high quality wash and very efficient extraction (G force up to 440 on the ASEP and CS ranges).

With less water and efficient extraction you will save money on water and utilities. There is less water to heat with high water removal, so drying the linen is faster and uses less energy. All our machines are built to last and are designed with large door openings,

quiet operation, and a lot of ergonomic features. All your operation costs will be kept to a minimum; therefore your return on investment will be faster.

BARRIER DESIGN WASHERS

Barrier washers to reduce the risk of spreading infections

How to safely handle linen in hospitals, clean rooms, pharmaceutical and institutions.

There are many potential sources of microbiological contamination in Hospitals, Nursing homes, correctional facilities, as bacteria are easily spread unless very strict controls are in place. Optimal sanitation is ensured by a dual door design separated by a sanitized partition. Disinfected laundry never comes in contact with soiled contaminated laundry. Today the R A B C (Risk Analysis and Bio contamination Control) standard brings the only logical solution to an efficient separation of clean and soiled linen, this standard avoid the risk of recontamination or cross contamination.

Since 2005 it has been recognized that Jimtec Services Limited barrier washers reduce the risk of spreading nosocomial infections (hospital acquired infections) during laundering.

With Jimtec Services Limited Barrier washers designed with a durability factor in mind, you will get an ergonomic heavy duty machine requiring little maintenance. You will get excellent mechanical action, and maximum flexibility (thanks to our control). Water consumption (and energy consumption to heat the water) will be low because of the small space between the inner and outer drum. On the other hand, our machines are compact, easy to install, and as the panels are removable you will have easy access to components.

FINISHING EQUIPMENT

Jimtec Services Limited offers a full line of higher quality finishing equipment with competitive prices.

Based upon your laundry production requirements, Jimtec Services Limited offers a full line of shirt finishing equipment, laundry presses, specialty presses Lay-Down and Cabinet shirt finishing equipment.

Our finishing equipments are built for efficiency, productivity, higher quality of finishing and higher profitability. Simplification and easier maintenance were important factors in the design, resulting in very few air valves, tubing, solenoids, etc. as compared to other machines.

TUMBLE DRYERS

Minimal wear-energy cost saving

Maximum productivity with a minimum use of energy.

Shortening drying time will result in energy cost saving, minimal wear of linen and durability of your tumble dryers. Tumble dryers are key players in the success of on-premises laundry facilities.

With Jimtec Services Limited Tumble dryers you will get superior results, thanks to the frequency inverter allowing acceleration and deceleration.

The Tumble dryers have large doors, easy access to all the components and high evaporation power. Last but not least our TD Range has an inverter so you no longer have to change the belts since the TD Range (from 10 to 70 kgs) is built without belts.

We also supply , install and service elevators:

- Kone Elevator
- Mitsubishi Elevator
- Shidler Elevators etc

Equipment

Critical to highly productive on-premise commercial and industrial laundries are proper equipment mix, machine programming, workflow, laundry design, labor, and load-type. At Laundry Systems of Tennessee, we know how to improve laundry productivity while reducing utilities and labor - helping our customers accomplish more, using less.

In doing so, we represent the highest quality commercial laundry equipment and assist clients in creating productive and efficient on-premise laundries by providing laundry layout specifications, equipment options and ancillary products to meet specific needs.

For preexisting on-premise commercial laundry facilities, we provide laundry equipment with improved washability, cost-effective options for utilities and ancillary items, expertise in proper chemical usage, and topnotch service.

SERVICE AND MAINTENANCE

How to Maintain an Air Conditioner

Central air conditioners are made up of two separate components: the condenser unit, located outside the house on a concrete slab, and the evaporator coil above the furnace.

Central air conditioners have two separate components: the condenser and the evaporator. The condenser unit is usually located outside the house on a concrete slab. The evaporator coil is mounted in the plenum or main duct junction above the furnace.

Most central air conditioners are connected to a home's forced-air distribution system. Thus, the same motor, blower, and ductwork used for heating are used to distribute cool air from the air conditioning system. When a central air conditioner is operating, hot air inside the house flows to the furnace through the return-air duct. The hot air is moved by the blower across the cooled evaporator coil in the plenum and is then delivered through ducts to cool the house. When the air conditioner works but the house doesn't cool, the problem is probably in the distribution system.

Both the evaporator and the condenser are sealed. Therefore, a professional service person should be called for almost any maintenance other than routine cleaning. Central air conditioners should be professionally inspected and adjusted before the beginning of every cooling season. However, don't let your maintenance end with this annual checkup. While there aren't many repairs you can make yourself, there are specific maintenance procedures you can follow to keep your system operating at peak efficiency.

Caution: Before doing any work on an air conditioning system, make sure the power to the system, both to the condenser and to the evaporator assembly, is turned off.

No matter how sophisticated your business infrastructure, you need expert maintenance services to ensure your business operates efficiently. **Jimtec Services Limited** can both advise on and offer a wide range of general maintenance services through its own highly skilled team and through a network of approved suppliers. **Jimtec Services Limited** service delivers the technical engineering solutions which improve the reliability and

efficiency of plant and systems. Planned preventive maintenance regimes deliver the optimum working environment, whilst also reducing costs and complying with statutory regulations and compliance.

A maintenance contract would:

- Validate any manufacturers warranty
- Enhance equipment life
- Maximize performance and energy efficiency
- Keep the air quality to a high standard
- Comply with current regulation

All maintenance contracts are tailored to suit our client's specific requirements and include the following:

- Fixed number of annual visits which range from 1-4
- Detailed inspection and cleaning of systems
- Written report and recommendations provided after each visit
- Priority scheduling of both maintenance and service calls
- Trained staff are available to provide technical advice and fault diagnosis assistance over the phone
- Schools and colleges are scheduled for maintenance visits out of term periods to eliminate disruption
- Health care facilities and hospitals are scheduled well in advance in order to access the required areas, consideration of noise; vibration and hygiene are closely monitored.
- We also provide our customers with a variety of other building services including:
 - Mechanical and electrical maintenance
 - Heating, ventilation and air conditioning upgrades
 - Installation, upgrades and servicing of Building management systems (BMS systems)
 - Asset surveys

- Residential, Static and mobile engineers
- Health and safety risk assessment
